FIG.12

The figure consists of two parts. The upper part is a top-down view of a rectangular substrate assembly. It features a central grid of four columns and two rows of square regions. The columns are labeled at the top as 24R, 24G, 24B, and 24R, grouped under a bracket labeled 24. The rows are labeled on the right as 122b (top) and 122a (bottom). Within each column, there are two horizontal bands of different patterns: a hatched band (labeled 121b on the right) and a dotted band (labeled 121a on the right). Vertical dashed lines separate the columns, with labels 40R, 25, 40G, 25, 40B, and 40R positioned below them. The lower part is a cross-sectional view along a "section plane" indicated by a dashed line. It shows three layers: a top layer 10 (with sub-layers 11, 12, and 13), a middle layer 20 (with sub-layers 24 and 21), and a bottom layer 23. Small rectangular components 22 are shown embedded in the middle layer 20.
